BUT FIRST, SCALP CARE!

The secret to beautiful, healthy, strong locks? Taking a scalp-first approach to your routine!

Many haircare products rely on sulfates, silicones, and waxes to give the appearance of health and softness. But in reality, these ingredients often coat the hair and scalp, preventing your products from being able to deliver nutrients and hydration to where they're needed most. The first step to healthy hair is to remove the buildup and nourish where it all starts: at the root.

SCALP CARE PRODUCTS

Scalp Purifying Scrub
With superfruit AHAs, apple cider vinegar, vitamin B6, and pink clay, this 2-in-1 scrub helps dissolve dead skin cells, stubborn product buildup, and excess oil. Helps clear the way for the nutrients your scalp needs to thrive.

Purifying Vinegar Rinse
This water-like purifying formula, infused with amino acids and apple cider vinegar, deeply cleanses to help hydrate, smooth hair, enhance shine, and preserve color vibrancy.

IR Clinical™ Hair Thinning Defense Scalp Serum
This serum contains a powerful blend of technologies that penetrate the scalp, nurturing the hair from the foundation. The lightweight, non-greasy formula is proven to help boost hair growth, immediately reduce breakage, and has shown noticeable results of thicker, fuller-looking hair in 60 days.*

Soothing Micellar Shampoo
Light, airy lather gently lifts and removes impurities from delicate tresses without causing irritation. Fragrance-free and eco-friendly, it's the perfect option for sensitive scalps and those with delicate, fine, and fragile hair.

*Based on an instrumental test by a third-party laboratory measuring the hair fiber diameter of healthy participants after product application.

WHAT'S MY SKIN TYPE

Dry? Oily? Sensitive? Acne-prone? Let's find out! Each skin type has different needs and concerns that require the correct daytime and nighttime routines to look its best.

The Tissue Test

The tissue test is an easy way to determine what your skin is trying to tell you.

On dry, clean skin, place a clean tissue on your face:

- If the tissue falls without sticking, you have dry skin.
- If the tissue clings for a few moments or oil transfers onto the tissue in certain areas of the face, you have normal/combination skin.
- If you notice visible excess shine that clings to the tissue, you have oily skin.
